

HOW MOBILE AI IMPACTS BUSINESSES?

Why Add AI to Your Mobile App?

Applying AI technology to your mobile app personalises and streamlines the user's experience at a level in-achievable by a 'one size fits all' interface.

These stats all reveal that the number one driver of app user adoption is to provide a solution that is undeniably useful and relevant to the user.

AI is a smart solution to efficiently

AI for Businesses

But increasing prevalence of AI in the business sector raises questions like

Outcomes

What Businesses are Using AI?

Amazon's Machine Learning - part of its AWS cloud services - allows businesses to analyse massive datasets to reveal patterns and also train its algorithm.

Google's Translate API uses machine learning to deliver much more accurate translations.
