Mobile VoIP Chat Applications

The Challenge

A robust enterprise inventory management platform for end-to-end management of inventory allocation process to employees, support request and tracking, warranty management via SSO enabled secure access, Push notifications & alerts and more..

The Solution

StarTele Logic team worked closely with the client, right from conceptualization to actual development and implementation of the required system with Single Sign-On integration for employees. The developed solution features robust backend wherein the role begins from user creation on the employee, right up to their last date including sign-off and settlement of devices, damage reporting, support ticket tracker, buy-back and more.

The delivered solution automates and streamlines the following tasks in an Enterprise :

- Issue devices to Employees
- Automated reminders
- Custom workflows
- AMC/Warranty update
- QR/Barcode support
- Support request and tracker

Digital tools & Tech

- PJSIP
- XMPP
- G729
- OpenSIPS
- JSON Web Services

Platforms

The developed apps are available on Android & iOS Store for users.

About StarTele Logic

StarTele Logic offers expert IT consulting and development services for next generation mobile and enterprise mobility applications. The organization's DNA resides in building Android and iOS smartphone apps backed by a robust cloud-based backend infrastructure. Apart from specializing in apps for iOS and Android development, we are also experts at incorporating IoT and VoIP based solutions to create future-ready apps.
