

Case Study

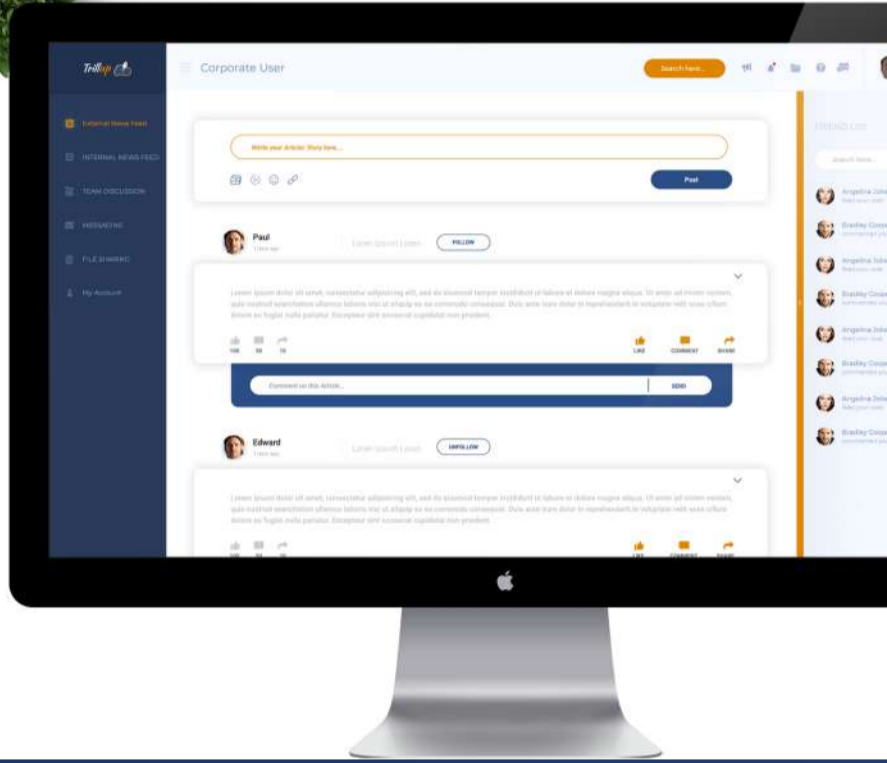

Trillup

TrillUp is a communication platform where you can chat, talk, collaborate, share with your team as well as external partners to get things done. It has instant messaging, audio-video calls, multi-party video conference, meeting schedule, news sharing, work with external partners, channel creation, screen, and file sharing capabilities all from one, easy-to-use program solution.

The Challenge

The main challenge was that the content had to be efficient and streamlined with the groups, sub-set of users, external partners and individuals. We had to ensure that the video conferencing and sharings were implemented in a way that it becomes easy to communicate using WebRTC platform.

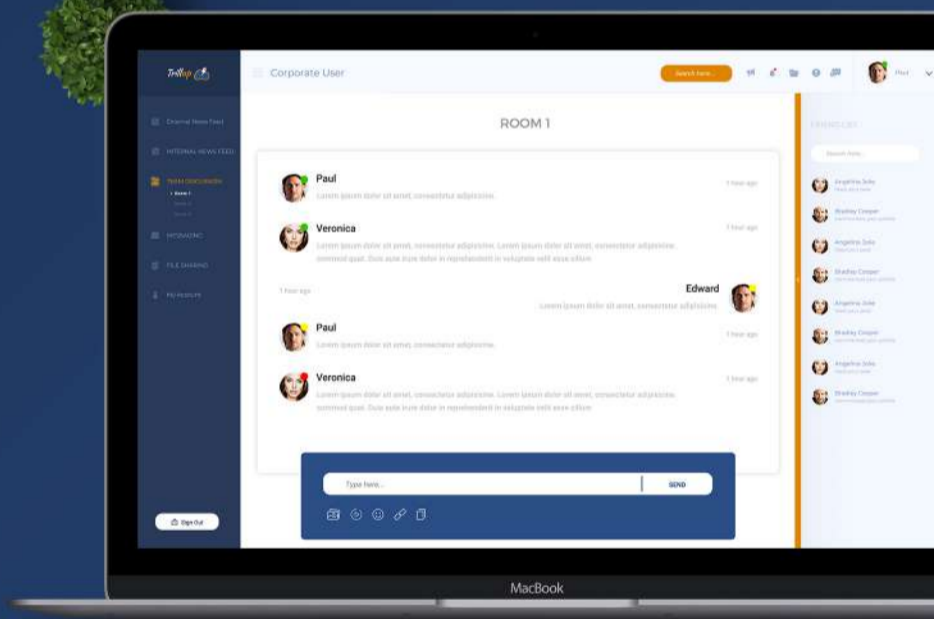

The Solution

At StarTele Logic, our team has built a cross-platform telephony platform to route and interconnect popular communication protocols using audio, video, text or any other form of media, that provide all the core functionality and goals including modularity, cross-platform support, scalability and stable solution for future.

Top Features of Trillup

- Instant Messaging
- Screen Share
- Audio Call
- Team Discussions
- Confrence Video Call
- File sharing
